

## Raejeanne Skillern

President,  
Communications,  
Enterprise and Cloud

Raejeanne Skillern is President of Communications, Enterprise and Cloud (CEC) at Flex, the manufacturing partner of choice that helps a diverse customer base design and build products to improve the world.

Ms. Skillern oversees the delivery of Flex's design and manufacturing solutions, integration services, and global deployment models for leading cloud, datacenter, and communications solutions providers. This includes managing and executing the business strategy that enables customers to innovate and create products at global scale, while preparing for a digital future where everything is smart and connected.

Prior to joining Flex in 2019, Ms. Skillern was vice president of the Data Center Group and general manager of the Cloud Service Provider Platform Group at Intel Corporation. She managed the business, roadmap and customer engagements for public cloud infrastructure deployments, optimizing edge-to-cloud data center technologies.

Ms. Skillern earned a bachelor's degree in mathematics and computer science from Pepperdine University, and an MBA from Marylhurst University.
