flex[®]

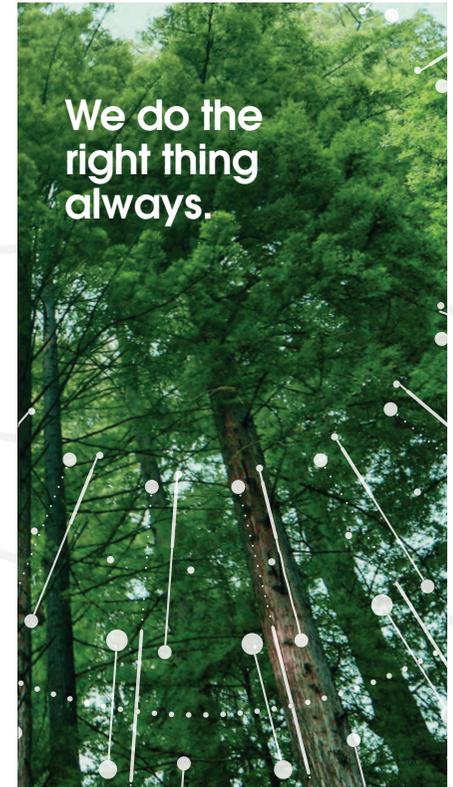

Who We Are

Flex is the manufacturing partner of choice that helps a diverse customer base design and build products that improve the world. Through the collective strength of a global workforce across 30 countries and responsible, sustainable operations, Flex delivers technology innovation, supply chain, and manufacturing solutions to various industries and end markets.

We help them to navigate successfully through regionalization, artificial intelligence, the emergence of 5G and advance manufacturing.

Our values define and drive us. It is at the core of our interactions as we build a more inclusive workplace, champion for a more sustainable future and provide an environment where our diverse workforce can thrive and reach their potential.

These values enable us transform ideas into great products.

What We Do

Our purpose is to make great products for our customers that create value and improve people's lives. We help a diverse customer base design and build the products that make the world a better place.

Through the collective strength of a global workforce of 160,000 employees across 30 countries and responsible, sustainable operations, we deliver technology innovation, supply chain, and manufacturing solutions to various industries and end markets.

The Flex Design Center in Stuttgart is a hub for Automotive excellence in product design for customers in Europe and around the world. As an experienced technology partner, we help get our customer's ideas from prototype to product. safely and quickly. Through powerful partnership and creative collaboration we help build the most advanced automotive solutions across a number of areas.

Autonomy

Self-driving vehicles are set to bring us to a new era of transportation. Flex is helping customers integrate autonomous features into their vehicles as they progress along this journey.

Connectivity

With deep expertise and practical experience in implementing connectivity protocols in automotive solutions, Flex is enabling the next generation of intelligent mobility.

Electrification

Flex provides a range of innovative solutions for customers looking to satisfy the growing demand for efficient and technology-enabled automobiles.

Smart Tech

The smart car is evolving. Flex invests in resources and technologies that make the driving experience safer, more convenient and more luxurious.

OUR PURPOSE

Make great products for our customers that create value and improve people's lives.

What Our Employees Say

„Being part of a multicultural team that is driven by highly motivated and open-minded people, always seeking for the best solution and getting the chance for personal development - that is FLEX.“

Daniela Behrens,
Business Development Manager,
Stuttgart Design Center

“Working with automotive customers, learning more about people’s needs and being exposed to new and different technologies makes me feel I am building the future today.“

Tino Casula,
Head of Lightlab,
Stuttgart Design Center

“For me Flex is like a family, the atmosphere, the work ethic is great and is something you don’t find everywhere.“

Ignacio Longares,
Director Smart Electronics,
Stuttgart Design Center

“Flex’s core values define and has driven me to succeed in a collaborative, inclusive and rewarding environment. Each day offers a new opportunity that is not limited to location or scope.“

Melanie Schuttenberg,
VP, Business Development,
Stuttgart Design Center

Driving sustainability across our company and our value chain

We embrace opportunities to build a healthier, cleaner, more resource-efficient world. Combining our wide-ranging industry knowledge with our passion to innovate, we transform sustainability-driven ideas and make them a reality.

We work to have a lasting positive impact by providing value for our employees, customers and investors, and we aim for the social and environmental change that makes our stakeholders proud to work with or for us.

Create the
extraordinary.
