

Powering Artificial Intelligence

Capacitive Energy Storage System (CESS)

The Flex CESS is the first to market Capacitive Energy Storage System which balances utility power in datacenters.

Main features

- Supports and balances power supply systems during large power transients
- Long lifespan
- Operating temperature +10 to +45°C
- 16kW Local Energy Storage Tray (LEST)
- Parallelable up to 8 units per Rack Power Zone

Applications

- AI servers
- Hyperscale cloud services

Dimensions (H x W x L)

465 x 788 x 44 mm / 18.3 x 31 x 1.73 in

Part number	Flex CESS
Output power max.	16kW
Output voltage	45.5V to 51.5V
Output current	+/- 320A
Input voltage range	45.5V to 51.5V
Cooling	Fan cooled
I/O connector	BK500
Safety	UL810, UL81A, UL810B, IEC 60384, IEC 62813
Communication	MODBUS over RS-485

Flex's CESS is designed with Musashi's Hybrid SuperCapacitors, known for excellent power density, longevity, and reliability

Flex (Reg. No. 199002645H) is the manufacturing partner of choice that helps a diverse customer base design and build products that improve the world. Through the collective strength of a global workforce across 30 countries and responsible, sustainable operations, Flex delivers technology innovation, supply chain, and manufacturing solutions to various industries and end markets.
