Gus
Shahin

Chief Information Officer

> **Gus Shahin is the chief information officer at Flex, the manufacturing partner of choice that helps a diverse customer base design and build products to improve the world.**

Mr. Shahin is responsible for driving Flex's corporate IT strategy and delivering agile, scalable end-to-end systems and tools, enabling seamless collaboration, pricing, contract management, and planning across all sites, and oversees the business process excellence and global business services organizations.

In his role, he is focused on implementing innovative IT solutions, including artificial intelligence (AI), augmented and virtual reality (AR/VR), and industry 4.0 technologies, to further enable the company's modern manufacturing capabilities.

Previously at Flex, Mr. Shahin was responsible for customer and segment IT support, global implementation of core supply chain IT systems, customer solution architecture, and e-learning and knowledge management teams. He has also managed factory operations, global IT deployment and the mobile and consumer division's IT team.

Mr. Shahin holds a bachelor's degree in mechanical engineering from the University of Louisiana, and a master's degree in engineering from the University of Western Ontario.
