flex

Four keys to finding your data center infrastructure partner

By 2021, cloud data centers will process 94% of compute workloads.[1] Cloud providers need to be nimble and have the necessary capacity to deliver cost-effective cloud infrastructure. Choose a partner who offers:

1 Standards-based, custom-designed servers to accommodate emerging innovations and technologies

2 Open source software integration to onboard new applications faster and with more flexibility

3 Global supply chain presence to ensure end-to-end support along with agility, scalability and reliability

4 A collaborative ecosystem to take advantage of the latest offerings regardless of supplier

Together, we can prepare you for the future of cloud data centers.

1 Custom data center infrastructure solutions
2 Expertise in open source software integrations
3 Worldwide manufacturing and logistics presence
4 A rich ecosystem of supply partners
