

Rob Campbell is president of consumer devices at Flex, the global manufacturing partner of choice that helps a diverse customer base design and build products to improve the world.

In his capacity, he leads the consumer devices segment, focused on mobile phones, audio devices, laptops, and set-top boxes.

Mr. Campbell has spent the past seven years at Flex, initially leading the commercialization and growth of the newly formed Component Services and Infinex business units, before eventually assuming full responsibility for leading the entire Component Services Group, comprised of Central Procurement, Component Services and Infinex.

Mr. Campbell started his career at Texas Instruments and Advanced Micro Devices in technical sales management roles. He joined Flex from Future Electronics, a multi-billion-dollar electronics distributor, where he was a Corporate Vice-President.

Mr. Campbell received his Bachelor of Science in Electrical Engineering from the University of Florida and completed the Executive Education program at Stanford Graduate School of Business.
