Implementing innovative solutions for industrial and professional service robots

Learn more at flex.com/industrial-robotics

When you want to design that next-level robotics product, we can help you optimize and deliver your solutions.

Many robotics companies have great subject matter experts in robotic systems. You can take advantage of our expertise in optical, electrical, mechanical and embedded software development. We provide advanced engineering services, manufacturing know-how, and supply chain management to optimize and scale products effectively.

As a full-service robotics team, we deliver:

- Deep, cross-industry experience in engineering, design support and manufacturing
- Complex integration for robotics products, sub-assemblies and components
- Solutions for professional service robotics, including automated storage and retrieval systems (ASRS), automated guided vehicles (AGVs) and autonomous mobile robots (AMRs)
- Design engineering subject matter experts who can support and supplement your team
- Manufacturing test development, including specialized testers for calibrating sensors
- Global and regional manufacturing capabilities
- Robust, flexible supply chain with real-time insights and logistics services

Flex (Reg. No. 199002645H) is the manufacturing partner of choice that helps a diverse customer base design and build products that improve the world. Through the collective strength of a global workforce across 30 countries and responsible, sustainable operations, Flex delivers technology innovation, supply chain, and manufacturing solutions to various industries and end markets.
