flex

Flex is a leader in designing and building groundbreaking technology that is transforming how the world moves. We collaborate with our customers and partners to transform ideas into intelligent solutions across multiple global industries - servers, 5G, health, consumer products, and beyond.

With the challenging new ecosystem of autonomous and connected cars, the need for breakthrough technologies has never been greater. **This mobility revolution requires a unique clarity of vision, proven technical expertise, and dedication on a global scale.**

Flex Automotive Solutions is prepared for any challenge. Our access to innovation will give you a head start, our focused design capabilities will make sure you stay ahead, and our endless manufacturing experience will ensure you succeed. **Imagine what we can do, together.**

AUTONOMY
Advancing the transition to autonomy through decades of server and automotive expertise

CONNECTIVITY
Enabling seamless automotive connections using knowledge from across the connected ecosystem

ELECTRIFICATION
Improving vehicle efficiency, power transfer, and power storage at a competitive cost

SMART TECH
Enhancing the automotive consumer experience with innovative cross-industry smart solutions

Telematics & V2X Platform

Connected Cars are no longer a pipe dream. Or "coming soon." They're here. Essentially every new vehicle rolling out of the factory features some kind of wireless connectivity.

MORE THAN JUST A WI-FI HOTSPOT

The new battleground is just how connected those cars are. Simply providing a Wi-Fi hotspot won't excite consumers anymore. And ignoring Vehicle-to-Everything (V2X) leaves you behind.

ENABLE OVER-THE-AIR UPDATES WITH EASE

Our extensive connectivity experience helps put us at the forefront of Connected Cars. We can help you not just meet, but exceed your customers' expectations.

Gen 4 available features

5G

2x1GB + 8x100BASE-T1

12xCAN-FD

802.11 N/AC

BT5/BLE

OTA ready
